26. Employability Skills

All courses > Linux Terminal & Github

Duration: 5 Class Days
Points: 100

Objective

Students will create a GitHub account and complete the entire **Terminal Introduction** section of WebTerm Adventure.

WebTerm allows students to practice Linux terminal commands directly in the browser through guided lessons and activities.

Learning Targets

By the end of this assignment, students will be able to:

- Create a professional GitHub account
- Explain the purpose of a terminal interface
- Navigate a Linux file system
- Create, move, rename, copy, and delete files and folders
- Use common command-line tools
- Demonstrate persistence and problem solving when learning new technology

Students will complete all lessons in the **Terminal Introduction** section.

Employability Skills Assignment #2

Course: AP Computer Science Principles (AP CSP)

Assignment Title: Big Idea 2: Data Technology Research Symposium

Research time: 5 days; 2 Days Presentations

Description:
Students worked in teams to research a data technology topic and deliver a professional presentation on its history, contributors, algorithms, industry applications, career pathways, and future impact. Students were expected to demonstrate business casual professionalism, effective communication, teamwork, research skills, and proper source citation.

Employability Skills Addressed:

- Professional Communication
- Teamwork and Collaboration
- Leadership
- Research and Information Literacy
- Public Speaking
- Professional Appearance
- Critical Thinking
- Career Readiness

Career Readiness Connection:
Students developed workplace presentation skills by researching technical topics, collaborating with team members, communicating findings to an audience, responding to questions professionally, and exploring technology-related career pathways.

Rubric Alignment:
The project rubric assessed skills directly tied to employability standards, including:

- Historical Research & Technical Accuracy (25 pts)
- Inventors, Contributors & Innovations (15 pts)
- Algorithms & Technical Explanation (20 pts)
- Industry & Career Connections (10 pts)
- Presentation Design (10 pts)
- Professional Communication (10 pts)
- Audience Engagement (5 pts)
- Business Casual Professionalism (5 pts)

Evidence:

- Student presentations
- Research summaries
- Presentation rubric
- Student presentation photographs
- Professional attire expectations

- Teacher feedback forms
