33 Program Equipment

Computer Science and Business Education Programs
Centennial High School
2026-2027 School Year

Computer Science Program (Room I18)

The Computer Science laboratory is equipped with thirty-three Lenovo ThinkCentre M715 desktop computers operating on Microsoft Windows 11. Each workstation includes 8 GB RAM and a 256 GB SSD and serves as the primary instructional platform for all Computer Science pathway courses.

Specification	Description
Computer Model	Lenovo ThinkCentre M715 Desktop
Quantity	33
Operating System	Microsoft Windows 11
Memory (RAM)	8 GB
Storage	256 GB SSD
Network Connectivity	District Ethernet and Internet Access

Primary Instructional Equipment

Equipment	Quantity	Description
Lenovo ThinkCentre M715 Desktop Computers	33	Primary student and teacher workstations used for daily instruction
Lenovo ThinkPad Laptop	1	Teacher workstation
GMKtec Mini PCs	2	2025 models with Intel processors, 16 GB RAM, and 500 GB SSD storage used for specialized instructional activities
HP Printer Pro 8600 Plus	1	Classroom printing and instructional materials
Finch Robots	15	Robotics and physical computing instruction

Legacy and Supplemental Technology Resources

The following equipment remains documented within the classroom inventory but is not part of the primary instructional technology environment. These resources are legacy assets, have reached end-of-life support, are no longer manufacturer-supported, or are used only on a limited basis.

Equipment	Quantity	Status

Lenovo ThinkPad P53s Laptops	32	Legacy supplemental inventory; not routinely used for instruction due to performance limitations
MakerBot Replicator 3D Printer	1	Legacy equipment maintained in inventory; limited instructional use
Additional 3D Printers	4	Legacy equipment maintained in inventory; limited instructional use
Parrot Mambo Mission Drones	12	Legacy equipment; manufacturer support discontinued
Holy Stone Drones	21	Legacy equipment; limited instructional use and no longer part of routine classroom instruction

Supplemental laptop computers, legacy 3D printers, and drone platforms remain part of the documented classroom inventory; however, these devices are not considered primary instructional resources.

Current instruction emphasizes software development, computational thinking, robotics, and project-based learning using Lenovo ThinkCentre workstations, GMKtec Mini PCs, Microsoft 365 applications, CodeHS, Visual Studio Code, Java, Python, GitHub, Unity 6, and Finch robotics technologies.

Computer Science Software by Course

Course	Software
Introduction to Software Technology	Microsoft Windows 11; Microsoft 365; Microsoft Edge; CodeHS; GitHub
AP Computer Science Principles	Python; Visual Studio Code; CodeHS; GitHub; Finch Programming Software
AP Computer Science A	Java JDK; Visual Studio Code; CodeHS; GitHub
Game Design & Simulation	Unity 6; Visual Studio

Business Education Program (Room E16)

The Business Education laboratory is equipped with thirty-four Lenovo desktop computers operating on Microsoft Windows 11. Each workstation includes 8 GB RAM and a 256 GB SSD and supports business, finance, entrepreneurship, employability skills, and FBLA activities.

Specification	Description
Computer Model	Lenovo Desktop Computers
Quantity	34
Operating System	Microsoft Windows 11
Memory (RAM)	8 GB

Storage	256 GB SSD

Instructional Equipment

Equipment	Quantity	Description
HP LaserJet Pro 400	1	High-volume network laser printer
HP LaserJet 3001dw	1	Wireless laser printer
Lenovo ThinkPad Laptop	1	Teacher workstation
Epson Projector	1	Presentation system
Wireless Keyboard and Mouse Sets	2	Instructional use

Business Education Software by Course

Course Area	Software
Business & Technology	Microsoft Word, Excel, PowerPoint, Outlook, OneDrive, Teams
Financial Literacy	Microsoft Excel, Word, PowerPoint
Entrepreneurship	Microsoft Excel, Word, PowerPoint
FBLA Activities	Microsoft Word, Excel, PowerPoint, Teams, OneDrive
